Power	<p>Freezer-rated battery with high-capacity 5200 mAh.</p> <p>Charges to 100% in up to 4 hours. EnergyBooster+ technology allows work up to 20 hours without charging (the test was performed at the interval of pressing the scan button every 3 seconds. and the screen is turned on and connected to a wireless network with constant ping.).</p> <ul style="list-style-type: none"> ● Optional extended battery 6000mAh. Charges to 100% in up to 5.5 hours. ● Optional backup battery (supercapacitor 10F) <p>All batteries support QC 3.0 quick charging.</p>
Hot Swap Battery	The device features a "Hot Swap" battery mode, enabling a seamless battery exchange before complete discharge. The transition to the backup battery (10F CAP), facilitated by an IC chip during the battery swap, guarantees a minimum of 5 to 10 minutes of battery life. During this interval, the device enters a specialized standby mode, providing ample time to replace the battery without necessitating a full OS reboot. All Android system settings, including wireless network connections, are preserved; open applications remain active, and data integrity is maintained. Inserting a charged battery allows for immediate resumption of work, exactly where it was paused.
Special Cold-Chain Features	<p>Heated Scanner Exit Window: Ensures clear scanning in low temperatures with robust condensation protection.</p> <p>Freezer-Rated Battery: A specialized 5200mAh battery, engineered for peak cold-chain performance.</p> <p>Intelligent Temperature Detection: Advanced sensors for optimal regulation of device and LCD temperatures.</p> <p>Condensation-Free Operation: Heating elements integrated to safeguard against moisture, ensuring a clear screen and scanner visibility.</p> <p>Motherboard Protection Technology: Advanced defense against condensation during frequent temperature transitions, preserving motherboard integrity.</p>
