

Switch FF-G8B

Switch FF-G8B 8 Port Gigabit

FF-G8B full gigabit non-network management switch products, providing 810 / 100 / 1000M adaptive RJ 45 ports, all ports support line speed forwarding and MDI / MDIX automatic flip function, plug and play. Using the latest high-speed Ethernet exchange chip, ultra-high backplane bandwidth design, with high-speed data processing ability, improve the smooth data transmission.

Port Number	8 Port
Port speed	1000mbp/s

Detailed

Model	FF-G8B
network port	1-8 ports support 10 / 100 / 1000Mbps
SFP port	nonsupport
Network standards	IEEE 802.3u IEEE802.3u IEEE802.3ab IEEE802.3x
Network media	10 / 100 BASE-TX: Class 5 and above unshielded twisted pair
Network signal distance	Transmission at 150 m
Backboard bandwidth	The 20 Gbps backplane bandwidth
pass-through mode	Store forward
Forward rate	100Mbps:14880pps
MAC address	1000Mbps:14800pps
Port function	The MAC address table for 4K

pilot lamp	Fast and forward, MAC automatic learning and aging
work environment	IEEE802.3X Full-duplex flow control and Backpressure semi-duplex flow control
Enter the power supply	Each port has 2 LINK / ACT. 100 / 1000Mbps. indicators
weight	1 complete machine power supply indicator lamp
size	Operating temperature: -10-55 C
