

RSH-WiFi-GS04 Gas Leak Detector

The RSH-WiFi-GS04 gas detector is designed to detect leaks of natural gas, methane and propane in residential areas. The device is equipped with a highly sensitive sensor that provides a quick response to an increase in gas concentration. When a leak is detected, the detector emits a loud beep and sends a notification to your mobile device through the Tuya Smart Life app. Its compact housing and wall-mountable design allow you to mount the detector in a location that is convenient for you. RSH-WiFi-GS04 is a reliable solution to keep your home safe

Detailed

Model	RSH-WiFi-GS04
Type	Wi-Fi Gas Detector
Detectable Gases	Natural gas, methane, propane, carbon monoxide
Power Supply	DC 5V (Micro USB)
Current Consumption	<150mA
Sensor Lifespan	3 years
Operating Temperature	0-55°C
Humidity	<80% (non-condensing)
Air Pressure	86-106 kPa
Device Dimensions	50×50×30 mm
Mounting	Wall Mount
App	Tuya Smart Life
